

Moaré

BRAND:
Santa & Cole

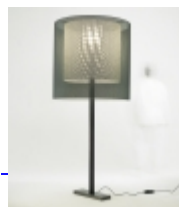

DESIGNER:
Arola Antoni

The Moaré series owes its name to the iridescent effect created by the two outer cylinder-shaped shades, a watercolour optical illusion produced by the superimposed textures against the light. Created in 2003, it soon gained international renown and over the years the collection has come to comprise a range of colours and formats for a wide variety of uses: from major shopping centres to enclosed private household spaces. A ladylike interplay of colour and transparency.

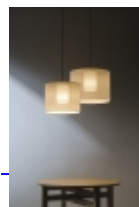

The lamp allows the option to use just a single shade rather than the two required to produce the highly sought-after moiré effect, still retaining the grace of its excellently proportioned outer geometry. A methacrylate interior diffuser, next to the three central bulbs, constantly helps to diffuse its bright light.
