

PRODOTTO:

Ondaria

BRAND:

Zumtobel

ONDARIA's form speaks for itself: soft contours and a homogeneous silhouette. The new luminaire combines austere basic geometry with soft outer contours.

ONDARIA is characterised by a concave luminaire surface that achieves a special level of plasticity and depth effect. The backlighting of the opal diffuser and an unobtrusive indirect component for ceiling illumination gives the circular luminaire the appearance of lightness, as if almost floating. ONDARIA provides a directionally neutral effect for all spacial interiors, forming an all-round, luminous eye-catcher.

With its soft language of form, ONDARIA is outstandingly suitable for prestigious areas such as foyers, lobbies and public spaces. Alternatively equipped with a luminance-reducing optic (LRO), the circular luminaire is also highly suitable for office workstations with flatly inclined displays.
