

PRODOTTO:
Solina LED

BRAND:
Zumtobel

SOLINA is a high-bay reflector luminaire which can be used for more than just industrial lighting. The luminaire designed by Charles Keller boasts a distinctive cylindrical design. With its smooth reflector and properly accommodated electrical unit integrated into a die-cast aluminium housing, the luminaire appears impeccable in decorative terms as well. Solina has therefore gained the position of a specialist in shop lighting, with a focus on fresh produce and interiors.
