

**PRODOTTO:**  
CH23 DINING CHAIR

**BRAND:**  
Carl Hansen & Søn

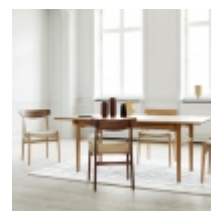

Carl Hansen & Søn is reintroducing its CH23 chair - one of the five pieces of furniture designed by Hans J. Wegner exclusively for Carl Hansen & Søn in 1950.

The CH23 dining chair is an early example of Hans J. Wegner's unique style and insightful craftsmanship, and contains many well-known Wegner details - for example, the elegantly shaped cruciform caps on the backrest and the special double-woven seat. Wegner was a master in making complex designs appear simple, and despite the CH23 chair's richness in unique detail, its appearance is ultimately light and simple.

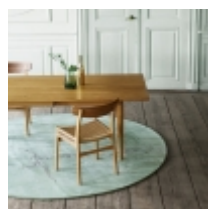

The chair has no armrests, which makes it practical for fitting around the table, even in small rooms. Thanks to its ingenious design and organic form, it is also unsurpassed for comfort.

The CH23 is made of solid oak or walnut, or a combination of these - with a form-pressed veneer backrest. The chair is available in different finishes, and with the special double-woven paper cord in either natural or black.
