Materia

The swivelling conference chair is part of the internationally acclaimed conference concept Centrum. This series has been a trendsetter in terms of both its design and concept. The easy chair is also suitable for waiting rooms and foyers. Centrum does not take up a lot of space, but is still very comfortable to sit in. The open back with its narrow ends allows the easy chair to be used by people of different body types comfortably. Sitting is made more comfortable and feels freer as a result of the mobility of the underframe.
