

PRODUCTO:
Chichibio d37

MARCA:
Luceplan

Chichibio gives you light on any part of the ceiling without drilling it. It is indeed a new type of floor/ceiling light for the interiors. its telescopic stem is equipped with a mechanical screw fixing system which guarantees stability and ease of assembly, allowing to position the diffuser to any point on the ceiling. Adjustable to a height of 2.2 to 3.3 metres, Chichibio, unlike the traditional floor lamps, can be easily moved around the rooms. Its diffuser has a special lid which protects the ceiling from halo effects and spreads a soft light emphasized by bright rays emitted through the holes in the polycarbonate.
