Former

All can easily be defined a sculptural  
bookcase. Sure enough, its job is to  
accommodate books and ornaments,  
vases and frames. But its original  
architecture with different-sized and  
different-embossed shelves makes it a  
possible separate object in the context  
of both day and night zone furnishing.  
It can be matched vertically or, more  
originally, both vertically and  
horizontally. Also the material which is  
used to shape it is very important. A  
thin alucobond sheet which sinuously  
models the black and white structure.
